

**ARTICLE 7.** To **act on the list of proposed equipment and capital purchases** for FY 2022 and see what sums of money the Town will vote to transfer from Free Cash, for the use of several departments for fiscal year 2022, and authorize expenditure of these funds for such purposes under the direction of the appropriate listed department and authorize the Select Board to dispose of any equipment declared surplus if replaced; or take any other action thereon.

Sponsored and supported by the Select Board

Estimate: **\$422,168**

Finance Committee recommends adoption of this article

Permanent Building Committee recommendations as noted

The proposed capital budget is printed on page 18 of this warrant.

**MOTION:** I move to **approve the list of proposed equipment and capital purchases** for FY 2022 as shown on page 18 of this warrant and transfer from Free Cash the sum of **\$422,168** for the use of several departments for fiscal year 2022, and authorize expenditure of these funds for such purposes under the direction of the appropriate listed department and authorize the Select Board to dispose of any equipment declared surplus if replaced.

**COMMENTS:** The ten capital expenditures listed on page 18 are part of the Town's Five-Year Capital Plan and have been approved by the Select Board, the Finance Committee and where appropriate, the Permanent Building Committee. All are proposed to be funded from the Town's Free Cash reserves and are not part of the real estate tax assessment.

Proposed Equipment and Capital Purchases for FY 2022

			Bldg Comm Recommendation
1	Fund Design of Glendale Road Culvert Replacement	\$55,000	Not Applicable
2	Fund Small Maintenance/Repair Building Projects	\$20,000	Recommend adoption
3	Fund Interior Improvement of Facilities for Firefighters	\$100,000	Recommend adoption
4	Fund Reboring Public Water Supply at Police Station	\$50,000	Recommend adoption
5	Fund Replacement of Speed Trailer	\$15,768	Not Applicable
6	Fund Purchase of Interactive Speed Signs (2)	\$10,400	Not Applicable
7	Fund Replacement of 2011 ¾ Ton DPW Pick-up Truck	\$65,000	Not Applicable
8	Fund Replacement of Truck and "Hot Box" Attachment	\$56,000	Not Applicable
9	Fund Replace/Repair/Add Dry Hydrants and Tanks	\$20,000	Not Applicable
10	Fund Supplemental Road Reconstruction Funds	\$30,000	Not Applicable
<b>TOTAL EQUIPMENT &amp; CAPITAL PURCHASES</b>		<b>\$422,168.00</b>	

## Capital items FY 2022

1. **Design of Glendale Road Culvert replacement:** This is for design services for the replacement of the antiquated stone box culvert under Glendale Road. This culvert has had two failures which required emergency repairs. In addition, the culvert should have guard rails. This is for the design of the repair. The actual construction will be considered at a future Town Meeting.
2. **Small Maintenance/Repair Building Projects:** The Town has been lax in caring for its municipal buildings for decades, letting small repairs become big ones by inaction. The PBC and DPW Superintendent would like to start a separate line item to keep the focus on small trim repairs and painting. Examples for work this year would include painting the molding roofline trim on Lincoln Hall and West Fire Station. Also, to repair rotted molding on the Police Station.
3. **Interior Improvements of Facilities for Firefighters:** When the West Fire Station was built in the 1970's there were no women on the department. Now a quarter of the department are women and the shower facilities need to be brought up to par. In order to not increase the size of the building, the plan is to repurpose space in the storage and equipment rooms to accommodate moving the toilet, hot water heater and shower.
4. **Re-Boring Public Water Supply Well at Police Station:** In 1995 a new well was drilled in front of the police station, 1307 feet deep. Until the new station was built in 2001 the well lay dormant, and during that time a seismic shift caused a rock at 240 feet to prevent the new well pump from accessing any water below that level. The water is high in iron and manganese, and with a hardness number of 216, it is considered very hard water, so calcium carbonate precipitates out and blocks up any building equipment that heats the water, such as the old humidifiers in the town hall and likely the newly installed steam humidifiers. It has been proposed that the water quality at 1000 feet may be sufficiently better to reduce the amount of chemical treatment necessary to mitigate the harsh characteristic.

5. **Replacement of Speed Trailer:** The current portable trailer used in various locations to act as a deterrent to speeding is non-functioning and beyond its useful life. A replacement trailer is proposed to be purchased for use by the Police Department at various locations around Boxford as needed.
6. **Purchase of Interactive Speed Signs (2):** These speed signs are solar powered and fixed in a single high traffic location. The flash messages to the drivers to “slow down” and “too fast”. There are two on Route 133 installed last year. These new ones are proposed for one to after the State salt shed at the exit off Route 95 on Topsfield Road and the other to be south of Elm Street entering Boxford Center.
7. **Replacement of ¾ ton DPW Pick-up Truck:** This for the replacement of a critical truck in the DPW fleet. The current truck has had an engine block failure and is no longer serviceable. The truck is used primarily by the Assistant Foreman for daily operations.
8. **Replacement of Truck and “Hot Box” Attachment:** This for the replacement of a Chevy 350 2WD regular cab with a special mounting body to accommodate a new “Hot Box”. A “Hot Box” is a mountable storage container for storing and hauling hot mix asphalt for roadway patch repairs.
9. **Replace/Repair/Add Dry Hydrants and Tanks:** The Fire department depends on access to water from ponds and underground cisterns around town. Maintenance and repairs of these “dry hydrants” is often required to keep them functioning. Also, replacement of older, smaller pipes are necessary.
10. **Supplemental Road Reconstruction Funds:** In order to adequately maintain and repair the roads in Town, the DPW relies on Chapter 90 funds from the State, funds from its operating budget and supplemental funds as may be provided in this capital line item.

# TOWN OF BOXFORD CAPITAL PROJECT REQUEST

Department:  
**Department of Public Works**

Date:  
03/03/2021

Project Title:     Glendale Road Culvert Replacement    

Basis for Estimate:   Estimate provided by TEC   Department Priority:   A    
*(please attach backup documentation)*

List project costs by fiscal year/

Estimated Project Costs

FY2021 \$55,000     

FY2022 \$     

FY2023 \$     

FY2024 \$     

FY2025 \$     

Project Description:

This is for the design services for the replacement of an antiquated stone box culvert under Glendale Road. This culvert has had at least two failures which resulted in the need to make immediate emergency repairs. In addition the slopes are steep and necessitate the installation of guard rails for public safety. The stone culvert is at the end of its useful life and does not meet current stream crossing standards. This design would be the basis for a permitted and fully designed culvert replacement project.

Net Annual Impact on Operating Budget:

Cost + Fixed Fee

Other

### Scope of Services:

The Town of Boxford (Client) has retained TEC, Inc. (TEC) to provide engineering services for the design and permitting of a replacement culvert near 38 Glendale Road in Boxford. Initial study (Task 1-3) will determine the required size of the proposed culvert. This proposal anticipates that the replacement structure shall be a precast-concrete box culvert, less than 10' span. If during initial study, it is determined that a bridge structure (10' or greater) will be required, an Amendment to the design services will be prepared. It is assumed that Massachusetts General Law Chapter 85, Section 35 will not apply to this culvert replacement.

### **Task 1 – Wetlands/Field Survey/Baseplan (Subconsultant) \$6,500.00**

Prepare an existing conditions base plan for the Glendale Road culvert crossing which will include a topographic survey. Project limits for the topographic survey will extend 100' beyond each approach, and 25' off the edge of pavement or curb line. Existing Right of Way line will be delineated at the culvert and property lines will be depicted as approximate. The base plan development shall include the following tasks:

- Locate and delineate wetlands at the culvert location including placement of numbered sequences of flags by a qualified wetland scientist to identify and delineate the boundary and type of wetland resources present. Wetland Resource areas associated with the site will be determined in accordance with the *Massachusetts Wetlands Protection Act* (M.G.L. c. 131, s. 40), its implementing regulations (310 CMR 10.00)
- Perform a topographic field survey of the project limits depicted above to include all above ground features.
- Establish survey control on Massachusetts State Plane Coordinate System (NAD83) and North American Vertical Datum of 1988.
- Bridge grid survey per MassDOT's LRFD Bridge Manual.
- Plot any public/private utilities based on visibility in the field and available record information
- Develop the base plan from the field survey and generate a surface and 1' contours.

**Task 2 – Geotechnical Engineering and Reporting (Subconsultant) \$10,000.00**

- Perform a one-day exploration program to include one boring at the existing culvert location. The boring depth is planned to be around 50 feet below existing road grade or the top of bedrock whichever comes first. 10-foot bedrock cores will be sampled at the boring and will be performed in accordance with MassDOT standards. The subsurface information will be summarized in boring logs and gradation (sieve analysis) and/or Atterberg limits testing will be performed on a few soil samples if needed. TEC's Subconsultant has included the cost for one police detail for one day to control traffic during the on-site drilling.
- Compile and analyze the data obtained to determine:
  - the allowable bearing capacity and settlement of the foundations,
  - lateral foundation performance,
  - seismic issues, including site class and liquefaction potential for soils, and
  - construction, earth support, and dewatering issues.
- Prepare recommendations summarizing the results of the findings in a report.

**Task 3 – Hydraulic Report (Subconsultant) \$4,500.00**

- Prepare a report outlining the hydraulic capacity of the existing culvert and recommendations for the upgrade of the structure based on the DEP Stormwater Standards, the Massachusetts Stream Crossing Standards and the MassDOT Stream Crossing Handbook.
- Obtain stream sediment samples at the bridge crossing location within the study area to supplement the scour analysis.
- Massachusetts Stream Crossing Standards will be considered and implemented to the greatest extent practical as a Public Works "maintenance project."

**Task 4 – Environmental Permitting \$7,000.00**

- Prepare a Notice of Intent (NOI) in accordance with Wetlands Protection Act and local bylaws as applicable for the structure location.
- Attend Conservation Commission hearings with the Town of Boxford as required.

**Task 5 – Preliminary and Final Engineering \$23,000.00**

- Review the results of the initial investigation to determine the appropriate replacement culvert.
- Prepare temporary traffic management plans in accordance with MUTCD and MassDOT standards. It is assumed that the plans will include a detour plan to close the road during construction.
- Review preliminary design and cost estimates with Client for feedback prior to final design and prior to filing environmental permits.
- Revise Preliminary Documents and address Client comments from Preliminary Design review. Prepare final design documents.
- Prepare a final set of structural calculations (if required) and Construction Plans.
- Construction Plans to include the following sheets:
  - General Plan and Construction Notes
  - Profile and Elevation
  - Culvert Details: Reinforcement, Foundation, Headwall and Wingwall
  - Traffic Management (Detour) Plan
- Prepare a final set of construction specifications and finalize the construction cost estimate.

It is anticipated that Right-of-Way acquisitions and associated easement plans will not be required.

**Task 6 – Bid Phase Services**

**\$4,000.00**

- Prepare bid tabs and compile bid documents to meet the Town's standard format for procurement purposes through the public bidding process. TEC will provide all bid documents to the Town via electronic download for online bidding.
- Assist the Town in soliciting bids for the construction, respond to questions during the bidding phase and issue addendum if necessary.
- Attend the bid opening and review all contractor bids to verify qualification. Upon completed review, TEC will issue a letter of recommendation to award the contract to the low and qualified bidder.

Additional services not listed above may be performed at the request of the Client and will be considered an amendment to this agreement. Services will begin upon signed authorization of this agreement. TEC will invoice the Client monthly on a percent complete basis.

This proposal is valid for a period of 45 days.

**Project PM:** Bob Niccoli, P.E., S.E.

---

Projects to be Funded from Free Cash:		
	Design for Glendale culvert replacement	30,000
	Various small project Town Bldg maintenance/improvements	20,000
	Facilities for Firefighters	100,000
	Reboring of Public Water Supply @ Police Station	50,000
	Repair/Replace Fire Alarm Control Panel Equipment at Harry Lee Cole	20,000
	Purchase Replacement Cruisers (Capital Funded Only)	Removed
		45,000

**Various Small Projects & Maintenance for town buildings-**

The Town has been lax in caring for its municipal buildings for decades, letting small repairs become big ones by inaction. The PBC and Chris Olbrot our Public Works Superintendent would like to start a separate line item from the maintenance to keep the focus on small trim repairs and painting. Estimate approximately \$100./ hour for spot wood repairs & paint.

Examples for this year include painting the molding roofline trim on Lincoln Hall (below right) & west fire station. Repair rotted molding on police station (below left) front portico that fell into Warren’s hand when he was putting up the Christmas lights.

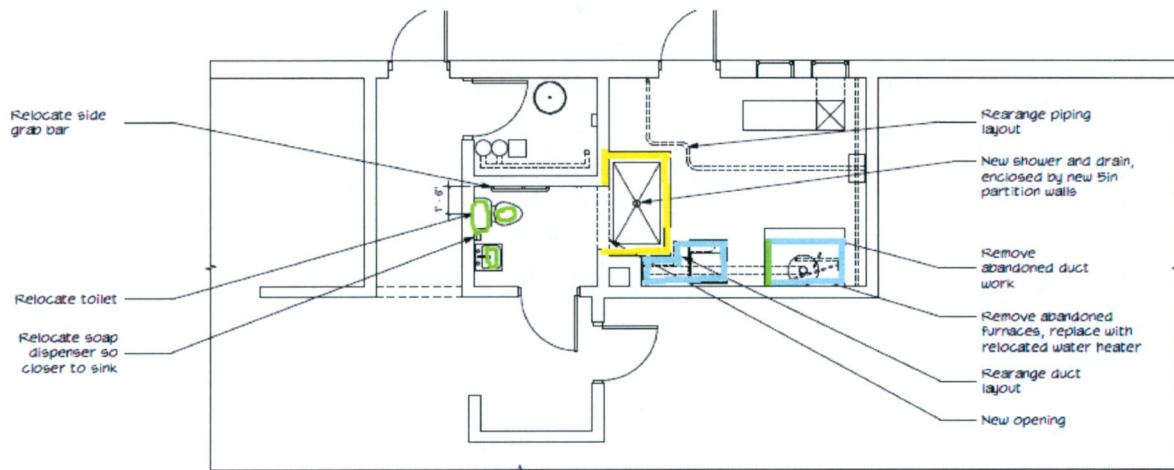

Photos below show rotting wood at roof of 188 Washington Street and broken weatherstrip at cellar entrance that allowed water into basement this January, and Lincoln Hall window sill.

### Facilities for Firefighters- West Station

When the west fire station was built in the 1970's there were no women on the fire department. Now a quarter of the department are women and they deserve their own shower facilities as the men already have. As we are not increasing the size of the building, we are repurposing space in storage and equipment rooms to accommodate moving the toilet, hot water heater, and shower. Below is the completed architect' drawings for the east station we are completing this summer.

### Re-boring of Public Water Supply at PD

1995- A new well is drilled in front of the police station, 1307 feet deep. Until the new station was built in 2001 the well lay dormant, and during that time a seismic shift caused a rock at 240 feet to prevent the new well pump from accessing any water below that level. The water is high in iron and manganese, and with a hardness number of 216, it is considered very hard water, so calcium carbonate precipitates out and blocks up any building equipment that heats the water, such as the old humidifiers in the town hall and likely the newly installed steam humidifiers.

It has been proposed that the water quality at 1000 feet may be sufficiently better to reduce the amount of chemical treatment necessary to mitigate the harsh characteristic.

Water- The well driller' report shows water-bearing fractures at 300', 950' & 1275'. I have spoken to both Vierra and Rollins well drillers about installing a jaswell seal at 250' after installing the pump at 1000' to block off the upper water vein and securing the bottom-most water. I have forwarded the 1995 engineers' report to Weston & Sampson, the town' water treatment operators for their review and cost proposal to handle the engineering and re-boring of the well. Below is a breakdown of some of the costs:

	2020	2019
Biomarine	3,100	4,700
Cassidy Water Conditioning	1,100	2,200
Weston & Sampson operator	9,300	11,200
	<hr/>	<hr/>
	13,500	18,100

## RADIO

### DESCRIPTION

Audio system, Chevrolet Infotainment 3 system, 8" diagonal color touchscreen, AM/FM stereo. Additional features for compatible phones include: Bluetooth audio streaming for 2 active devices, voice command pass-through to phone, wired Apple CarPlay and Android Auto capable. (STD)

## ADDITIONAL EQUIPMENT - PACKAGE

### DESCRIPTION

Snow Plow Prep/Camper Package includes (KW5) 220-amp alternator, includes increased front GAWR on Heavy Duty models, (NZZ) skid plates (transfer case and oil pan), pass through dash grommet hole and roof emergency light provisions. Contact GM Upfitter Integration at [www.gmupfitter.com](http://www.gmupfitter.com) for plow installation details and assistance. Note: if ordered for Camper usage, recommend ordering (UY2) Trailering wiring provisions (Requires 4WD model. Upgradeable to (KHF) Dual alternators (220-amp primary, 170-amp auxiliary). Included with (ANQ) Alaskan Snow Plow Special Edition. Not available with (F60) Heavy Duty Front Spring/Camper Package.)

## ADDITIONAL EQUIPMENT - MECHANICAL

### DESCRIPTION

Battery, auxiliary, 730 cold-cranking amps/70 Amp-hr (Requires (L8T) 6.6L V8 gas engine and either (KW5) 220-amp alternator or (KHF) dual alternators. Not available with (KW7) 170-amp alternator.)

Alternator, 220 amps (Included with (L5P) Duramax 6.6L Turbo-Diesel V8 engine or (VYU) Snow Plow Prep/Camper Package. Free flow on (L8T) 6.6L V8 gas engine.)

Skid Plates protect the oil pan, front axle and transfer case (Included with (Z71) Z71 Off-Road Package or (VYU) Snow Plow Prep/Camper Package.)

Capped Fuel Fill (Included and only available with (L5P) Duramax 6.6L Turbo-Diesel V8 engine or (ZW9) pickup bed delete.)

## ADDITIONAL EQUIPMENT - EXTERIOR

### DESCRIPTION

Bumper, rear, delete (Included and only available with (ZW9) pickup bed delete.)

Lamps, Smoked Amber roof marker, (LED) (Included with (ANQ) Alaskan Snow Plow Special Edition. Standard with dual rear wheels. Not available with (YF5) California state emissions requirements on single rear wheels.)

License plate kit, front (will be shipped to orders with ship-to states that require front license plate)

Vehicle: [Fleet] 2021 Chevrolet Silverado 3500HD (CK30953) 4WD Double Cab 162" LT (✔ Complete)

**ADDITIONAL EQUIPMENT - INTERIOR**

**DESCRIPTION**

Upfitter switch kit, (5) Provides 3-30 amp and 2-20 amp configurable circuits to facilitate installation of aftermarket electrical accessories. Kit with all required parts will be shipped loose with the truck for installation by the dealer or upfitter at customer expense. Installation instructions and technical assistance available at [www.gmupfitter.com](http://www.gmupfitter.com).

Defogger, rear-window electric (Included with (WPF) Fleet Comfort Package, (PCL) Convenience Package or (B59) Remote Start Package.)

Back-up alarm calibration This calibration will allow installation of an aftermarket back-up alarm by disabling rear perimeter lighting (Included with (ZW9) pickup bed delete. Not available with (8S3) back-up alarm or (UY2) trailer wire provisions.)

**ADDITIONAL EQUIPMENT - SAFETY-INTERIOR**

**DESCRIPTION**

Rear Camera Kit Kit includes camera, fixed position bracket & 19 ft cable with attachment clips. Rear camera radio calibration provided from the factory. See Upfitter Integration Bulletin for installation instructions at [www.gmupfitter.com](http://www.gmupfitter.com) (Requires (ZW9) pickup bed delete.)

**ADDITIONAL EQUIPMENT - OTHER**

**DESCRIPTION**

Fleet Free Maintenance Credit. This option code provides a credit in lieu of the free oil changes, tire rotations and inspections for one maintenance service during 1st year of ownership. The invoice will detail the applicable credit. The customer will be responsible for all oil change, tire rotations and inspections costs for this vehicle. (Requires one of the following Fleet order types: FBC, FBN, FCA, FCN, FEF, FLS, FNR or FRC. Not available with FDR order type.) \*CREDIT\*

---

Options Total

**Standard Equipment**

**Package**

Trailer Package includes trailer hitch, 7-pin connector and (CTT) Hitch Guidance (Deleted when (ZW9) pickup bed delete is ordered.)

**Mechanical**

Engine, 6.6L V8 with Direct Injection and Variable Valve Timing, gasoline (401 hp [299 kW] @ 5200 rpm, 464 lb-ft of torque [629 N-m] @ 4000 rpm) (STD)

Transmission, 6-speed automatic, heavy-duty (STD) (Requires (L8T) 6.6L V8 gas engine.)

Rear axle, 3.73 ratio (Requires (L8T) 6.6L V8 gas engine. Not available with (L5P) Duramax 6.6L Turbo-Diesel V8 engine.)

Durabed, pickup bed (STD)

GVWR, 11,400 lbs. (5171 kg) with single rear wheels (STD) (Included and only available with CK30953 model and (L8T) 6.6L V8 gas engine. Requires single rear wheels.)

Air filter, heavy-duty

# TOWN OF BOXFORD CAPITAL PROJECT REQUEST

Department:  
**Department of Public Works**

Date:  
03/03/2021

Project Title: \_\_\_Truck #25 Replacement w/ Hot Box\_\_\_\_\_

Basis for Estimate: Estimates provided from Vendors Department Priority: A  
*(please attach backup documentation)*

List project costs by fiscal year/

Estimated Project Costs

FY2021 \$56,000\_\_\_\_\_

FY2022 \$\_\_\_\_\_

FY2023 \$\_\_\_\_\_

FY2024 \$\_\_\_\_\_

FY2025 \$\_\_\_\_\_

Project Description:

This is for the replacement of a critical truck in the DPW Fleet. This would be a Chevy 3500 2WD regular cab with a special mounting body to accommodate for a new "Hot Box". The "Hot Box" is a mountable storage container for storing and hauling hot mix asphalt. This is critical to the fleet to be able to patch roadway repairs throughout the entire year.

Net Annual Impact on Operating Budget:
